

CASE STUDY:

Experity Health automates complex billing processes with Axcelinno

While Experity Health's suite of software and services platforms provides flexibility to handle a client's unique needs, this wasn't always the case for their Revenue Cycle Management (RCM) platform. Previously, the extensive planning and effort required to implement changes limited the RCM platform flexibility. With each update, the platform's complexity increased and needed additional time for testing. Experity Health realized a new approach to the RCM architecture was required to reduce the time to reimburse clinics.

Axcelinno's professional services collaborated with Experity Health and delivered a platform based on Red Hat Decision Manager, Red Hat Fuse, and Red Hat AMQ. Throughout the engagement, Axcelinno's hands-on, mentoring-based approach upskilled the Experity Health team to ensure future success. Now, Experity Health has a flexible platform to meet customers' needs without additional complexity.

THE BUSINESS CHALLENGE: MITIGATING MANUAL PROCESSES

Due to the original architecture, implementation of the business rules, and integration with other software solutions, Experity Health experienced lengthy processing times due to the manual effort required to process claims. The processing time led to delays and prevented the RCM platform from scaling to meet strategic business goals. Based on the challenges Experity Health faced, it was evident that the RCM platform required a new architecture and refactoring.

THE SOLUTION: DEPLOY RED HAT'S DECISION MANAGER TO ALIGN WITH EXPERITY'S GOALS

Experity Health partnered with Axcelinno and Red Hat to implement scalable business rules and integration solution that provides Experity Health the flexibility necessary to meet customer needs. The platform was required to decrease manual processes, reduce errors, and meet increased business demand for Experity Health's core products to meet customer needs.

The new RCM solution has accelerated the pace at which Experity Health delivers updates and new features to customers—while also increasing the collaboration among Experity Health teams. Standardizing on Red Hat software helps Experity Health's IT teams ensure updates to RCM are not only made quickly but with minimal risk of errors or outages for end users. Its new RCM platform's efficiency has helped Experity Health reduce its operational expenditure, including time savings and support costs.

Axcelinno implemented a robust, flexible platform using Red Hat Decision Manager, Red Hat Fuse, and Red Hat AMQ. Red Hat Decision Manager provides Experity Health the ability to quickly and easily define rules to evaluate medical procedure codes and billing codes to provide accurate billing. Red Hat Fuse and Red Hat AMQ allows Experity Health to integrate multiple systems to ensure data flows between systems quickly with the required availability.

Axcelinno's dedicated team mentored the Experity Health team on business rule best practices and implementation. Axcelinno created an open, highly collaborative atmosphere for the Experity Health team to ask questions and ensure they are equipped with the knowledge and skills needed for long-term success.

EXPERITY

Industry: Healthcare

Company Size: 500 - 1,000 Employees

Headquarters: Illinois, USA

KEY RESULTS

- Automated complex billing to reduce processing of 50,000 transactions to 1-2 hours.
- Reduced manual invoice process from 5 hours to minutes.
- Quickly adapt to healthcare regulations to ensure compliance.
- Deploy changes to customers in a matter of hours instead of weeks.

SERVICES & PARTNER ECOSYSTEM TECHNOLOGIES

- Axcelinno Professional Services
- Red Hat Decision Manager
- Red Hat AMQ
- Red Hat Fuse

For more information, call your Mainline account representative or call Mainline directly at 866.490.MAIN(6246).

THE RESULTS: A CONFIGURED EAP MEETS BEST PRACTICES

With the new Red Hat solution and support from Axcelinno's professional services, the Experity Health RCM platform delivers value to Experity Health customers faster, with improved performance and stability. Using Red Hat Decision Manager, Red Hat Fuse, and Red Hat AMQ, the RCM platform automates medical claims processing using business rule automation. The updated solution has allowed Experity Health to reduce the time required to process invoices to a matter of seconds from four hours per clinic.

With the RCM platform changes, Experity Health continues to be a leading provider of software solutions for urgent care centers and provides innovative solutions focused on customer care.

'Working with Axcelinno and having that knowledge transfer, what every single little detail is, was very key. We were able to work closely with the Axcelinno team to not only develop the system but also take it all the way to QA and Production with their collaboration.'

— Brandon Zweifel, Manager of Software Development, Experity Health
