SOAR: SECURITY ORCHESTRATION, AUTOMATION, & RESPONSE

It's not a matter of *if* a breach will happen, but *when*.

Security operations centers (SOCs) across industries are overwhelmed—facing alert fatigue, understaffed teams, and increasingly sophisticated cyberattacks. Protecting sensitive data, whether it's intellectual property, proprietary information, or personally identifiable information (PII), has never been more critical or more challenging.

So, how can organizations protect themselves—or better yet, prevent breaches before they occur?

A Security Orchestration, Automation, and Response (SOAR) solution enhances SOC capabilities by automating repetitive incident response tasks and coordinating people, processes, and technology to efficiently handle threats.

Why Do You Need SOAR?

1

RISING THREATS
The volume and complexity of security threats are escalating. SOAR automates routine tasks and delivers real-time threat intelligence, allowing your team to respond faster.

2

TOOL INTEGRATION
Security teams often work with disconnected tools, making data correlation difficult. SOAR integrates these tools into a unified platform for seamless incident management.

3

BOOST EFFICIENCY
Alert fatigue is real, leading to burnout and reduced productivity. SOAR automates alerts and streamlines workflows, so your team can focus on high-priority incidents.

4

COMPLIANCE SUPPORT
SOAR helps meet compliance requirements like GDPR and HIPAA by ensuring incidents are documented, tracked, and managed according to regulatory standards.

5

COST SAVINGS
By automating repetitive tasks, SOAR reduces the need for manual intervention, lowering operational costs and freeing up your team for more strategic work.

Key Benefits

1. Improved Efficiency of SOC Staff
2. Faster Response Times with Automation
3. Enhanced Visibility Aggregating and Correlating Data
4. Improved Compliance
5. Cost Savings by Reducing Manual Intervention

Mainline's SOAR Expertise

Mainline tailors SOAR solutions to your organization's unique needs, based on adversary Tactics, Techniques, and Procedures (TTPs) and Indicators of Compromise (IOCs). We don't just help you choose the right SOAR platform—we also handle implementation to ensure it runs at peak efficiency alongside your existing security tools. If needed, we provide knowledge transfer and training to empower your team for long-term success.

With a SOAR solution, you'll improve operational efficiency, reduce incident response times, and strengthen your overall security posture. Mainline's Cyber Ninjas bring the expertise and skill to help you maximize your SOAR investment and drive your security team's success.
