

# LOVE YOUR LINUX EVEN MORE.

**IBM LinuxONE™ is a Linux and open source superhero made for the app economy.**

**Combining the best of enterprise Linux and open source, LinuxONE is the most efficient, powerful, secure Linux platform.**

As users, devices and apps proliferate unabated, expectations continue to rise. Your services and transactions need to be secure, your data protected and your user experience tailored to your needs and available at all times.

Getting it right means growth and opportunity. Getting it wrong means running hundreds or thousands of servers, adding cost, complexity, latency and vulnerability—losing business.

## Meet LinuxONE

Enterprise Linux servers deliver the performance, data protection, service continuity and efficiency to differentiate you in the app economy.

Enterprise Linux servers deliver lightning-fast response times, every time, and 100 percent uptime, all the time.

The world's most secure Linux servers offer advanced encryption features and up to 28 times better security.

At scale, IBM LinuxONE™ costs 50 percent less than public cloud environments.

## Take the plunge

For more than 28 years, Mainline has built a track record of putting clients first with IT solutions that enable better business results. Let us help you differentiate your business in the app economy with LinuxONE.

Starting with an analysis of your current workload then building a capacity plan and providing implementation services, Mainline will deliver the help you need for your growing business.

80% of users will abandon a transaction because of a poor service experience

Get it right with IBM LinuxONE™.
